RESPONSE TO RESTRICTION REQUIREMENT

Claims 35–65 are pending in this application. In the outstanding Restriction Requirement dated May 23, 2005, claims 35–65 have been restricted into two groups. In response to the Restriction Requirement, Applicants elect the claims of Group II (claims 43-65) with traverse. The election with traverse is on the basis that the claims have already been fully searched and examined; therefore it would not present an undue burden to continue to examine claims 35-65 concurrently, and it is unreasonably burdensome to the Applicants to restrict the claims at this point. Further, the RAR antagonist provides a common unifying feature among the claims.

Applicants further elect the first species listed in the Restriction Requirement (a method of inducing chondrogenesis; claims 43-50 and 59). This election of species is made with the understanding that upon the finding of an allowable species, examination will continue with the non-elected species until all species have been examined or a non-allowable species is identified.

This application is in condition for substantive examination, which action is respectfully requested.

Respectfully submitted,

Karen A. Magri
